

Dear Parent/Carer

We have a problem with headlice in children's hair at the moment and ask that you help us to eradicate the problem.

We would ask you to regularly inspect your child's hair and recommend that you treat in the following way;

1. Condition the child's hair **every day**
2. It is imperative that the child's hair is thoroughly combed, with a nit comb, whilst wet **at least** once a day, to prevent the lice re-infecting the hair. If this is not done, then the headlice will return
3. This should be repeated for **at least two weeks**
4. **Please check the whole family's hair** and treat as above
